Career Objective

Aspiring Software Engineer with strong foundations in C and Java, driven by a passion for problem-solving and software development. Seeking an opportunity to build scalable, high-quality software solutions, contribute to impactful products, and strengthen my technical expertise while growing as a software engineer.

Technical Skills

Programming Languages: C, Java

Tools & Platforms: MySQL, GitHub, Linux, Figma, Cisco Packet Tracer

Core Strengths: Problem Solving • Data Structures & Algorithms • OOP • Logical Thinking • Debugging

Web Technologies: HTML, CSS

Education

B.Tech – Information Technology
Francis Xavier Engineering College
2023 – 2027

CGPA: 8.4

Internship Experience

Frontend Developer Intern – Infosmite

Developed responsive web interfaces using HTML and CSS during a 4-week Frontend Developer Internship at Infosmite.

Achievements & Certifications

- 1st Prize – EXCENTRA '24 (with cash prize)
- 1st Prize – Code Sprint Programming Competition
- 2nd Prize – Podium Idea Presentation
- Outstanding Problem Solver Award
- NPTEL – Joy of Computing using Python (Elite Silver, 82%)
- Honours Diploma in Computer Applications (CSC)
- UI/UX Inplant Training Completion

Technical Training & Mentorship

C Programming Trainer

1. Delivered 10-day training sessions on C programming fundamentals and Data Structures for students
2. Conducted training sessions on core C programming concepts at Mother Teresa Engineering College

Projects

Code Relay – Multi-Level Coding Competition System (Live Project)

- Developed a web-based platform for managing a structured coding competition
- Implemented multi-level evaluation, secure login, and leaderboard system
- Used Google Apps Script & Sheets for real-time score tracking

Webnify Services – Business Website (Live Project)

- Developed a responsive business website with multiple pages
- Implemented form-to-WhatsApp redirection for user communication

Online Voting System (Contest Platform)

- Built a voting system for logo, tagline, and video contests
- Tech: HTML, CSS, JavaScript, Google Sheets

India's Freedom Struggle – Interactive Web App

- Designed a timeline-based web application
- Implemented state-wise map and dynamic content display

Cricket Scorecard System (C)

- Developed a cricket scorecard system for player-wise score tracking and winner determination through independent coding.

Text-Based Cricket Game (C)

- Developed a text-based cricket game with complete logic implementation
- Built entirely from scratch with independently designed game logic and implementation.

Interactive Photo Gallery (UI/UX Design)

- Designed responsive UI using Figma
